Re: CR 308 Fire 7/17/18-7/19/18

Llano County Office of Emergency Management and Texas Department of Forestry currently estimate that approximately 1,800 acres has burned and is currently approximately 60% contained. No homes or structures have been lost and there have been no injuries.

We are initiating daylight ground operations to attain our goal of 100% containment. We are also conducting air operations with fixed wing and rotary aircraft and request that no drone flights be conducted in the area of the fire for a 5 mile radius. Llano County is being assisted by numerous agencies throughout the region to whom we are grateful. We will provide a complete list of assisting agencies later today as we are still receiving assistance and more is arriving.
